**PRODUCT HIGHLIGHT**

### Micro "D" Connectors

These economical connectors are available in a variety of models, each optimized for application in a specific material and for a specific method of attachment.

Our connectors find common utility in packages of aluminum, stainless steel, brass, copper and kovar in addition to other material types.

Their exceptional reliability emanates from the design, where particular attention has been given to thermal stress considerations and proper CTE matching of materials affecting the seal.

For more information on this product, refer to Bulletin 510.
