**PRODUCT HIGHLIGHT**

## **SMP CONNECTORS**

SHP has developed a new line of hermetic SMP connectors, complying with MIL-STD-348, with a variety of options with improved ease of application and hermetic performance.

Common configurations are available as well as new robust designs, which improve ease of application and hermetic reliability.

All of these connectors feature tight specifications which assure proper plating control for wire bondability of pins and prevent gold embrittlement of solder joint when using tin-based solders.

For detailed information on these devices, please refer to our Bulletin 900, now available on our website.
